Minutes by	Bernd Hekele

2 Agenda

- Update on Activities

3 Discussion

- Update on Activities

Activities have been updated in the issue tracker of SRS-Analysis. <https://github.com/openETCS/SRS-Analysis/issues>

Work has been done in the data dictionary. API-Services are added to present the model of the API in the system. <https://github.com/openETCS/modeling/tree/master/model/sysml/dataDictionary>.

A good example for a quite progressed sub-function is represented with the VDD model <https://github.com/openETCS/modeling/tree/master/model/sysml/WP3-Initial-Architecture/ManageLocationRelatedInformation/ManageTrainPosition/ValidDataDirect> and BGO https://github.com/openETCS/modeling/tree/master/model/sysml/WP3-Initial-Architecture/ManageLocationRelatedInformation/ManageBaliseInformation/DetermineBGorientation_LRBG.

After completing the missing parts (esp. interfaces) the verification of the issue can be started (interface with WP4).

The next modelling session (Thursday, 10:30 - 11:30) will focus on the SCADE model of location information.

4 Notes

- Note: Location of Meeting Minutes
You can find these minutes here: https://github.com/openETCS/governance/blob/master/scrumsMeetings/WP3-Modeling/Minute_20140328_WP3.pdf. Please, use the issue tracker for findings in the minutes.
