Minutes by	Bernd Hekele

2 Agenda

- WP3 Initiative at Braunschweig Workshop
- WP3 Resource Planning
- WP3 Action Plan
- Repository

3 Discussion

You will find program management information for WP3 in this location: <https://github.com/openETCS/modeling/wiki/Project-Management>

- WP3 Initiative at Braunschweig Workshop
We agreed on Braunschweig on a proposal by Pierre-Francois Jauquet to start SysML modelling activities in a joint action. Details are described this slideset: <https://github.com/openETCS/modeling/blob/master/BraunschweigWorkshop-2013-10-09/WP3-ActionPlan-Summary.pdf>
To support the activity a new repository has been opened as a part of WP3: SRS-Analysis. The project is incubating. Visibility is strictly limited during incubation.
- WP3 Resource Planning
Due to the new strategy we need an update of planning information. In a first step, Baseliyos will collect the new figures. But, also planning data in Itea data have to be updated afterwards.
