3 Discussion

- Update on Activities

Results of the modelling getting started workshop are available on Github: <https://github.com/openETCS/modeling/tree/master/model>

We have introduced a new branch to continue working on modelling artefacts: https://github.com/openETCS/modeling/tree/SysML_modeling/model.

The openETCS toolchain release available for modelling showed some severe issue. First analysis showed the Papyrus component needs updating. Since the issues observed corrupted the SysML model the toolchain cannot be used until a correction has been released. Main impact is the use of the traceability tool which is not available outside openETCS. A workaround this situation has been discussed during the workshop.
